Fetal Bovine Serum

SeraPrime guarantees product quality and accuracy of geographic origins.

South American Origin (Brazil) USDA Country Approved Paraguay, Uruguay and More

Our South American FBS is collected aseptically and triple-filtered at 0.1µm to produce a sterile, cell culture-ready product. Every batch is tested for endotoxin and mycoplasma levels, BVD virus, hemoglobin and total protein rates, and cell culture performance. The serum is collected or imported and treated in agreement with European regulations.

Cat. No. F31016-50 | 50mL
Cat. No. F31016-500 | 500mL

United States Origin

Our U.S. Origin FBS is triple-filtered at 0.1µm and meets 9CFR 113.53c, 113.46 and 113.47 standards, with full ISO 13485 and 9001 certification. Every batch is rigorously tested to ensure sterile, cell culture-ready performance. Ultra low endotoxin and hemoglobin levels available meeting global export requirements.

Cat. No. F11713-50 | 50mL
Cat. No. F11713-500 | 500mL
